

Name: _____ Graphs Tell Stories

Here is an example of a graph that tells a story about listening to the radio:

Listening to the radio

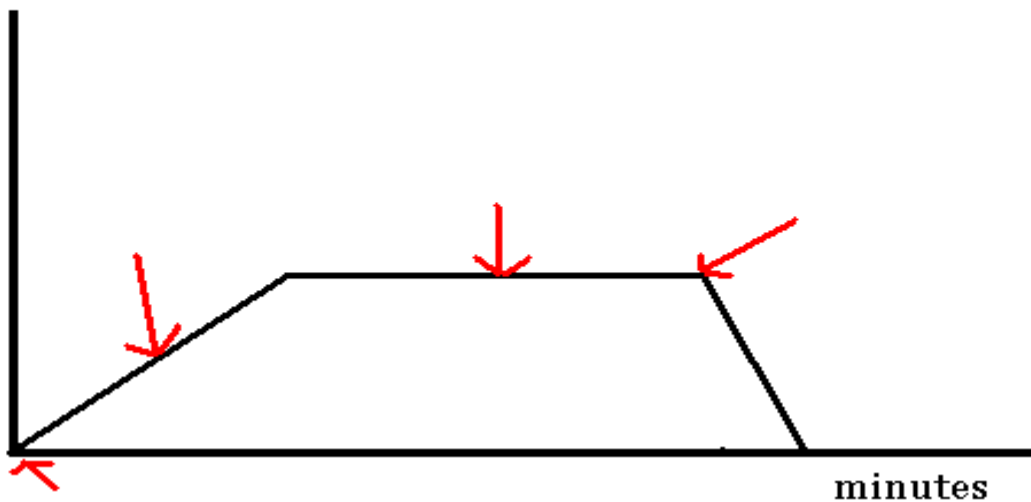

#1) No matter what story the graph is telling, what does a flat horizontal line represent?

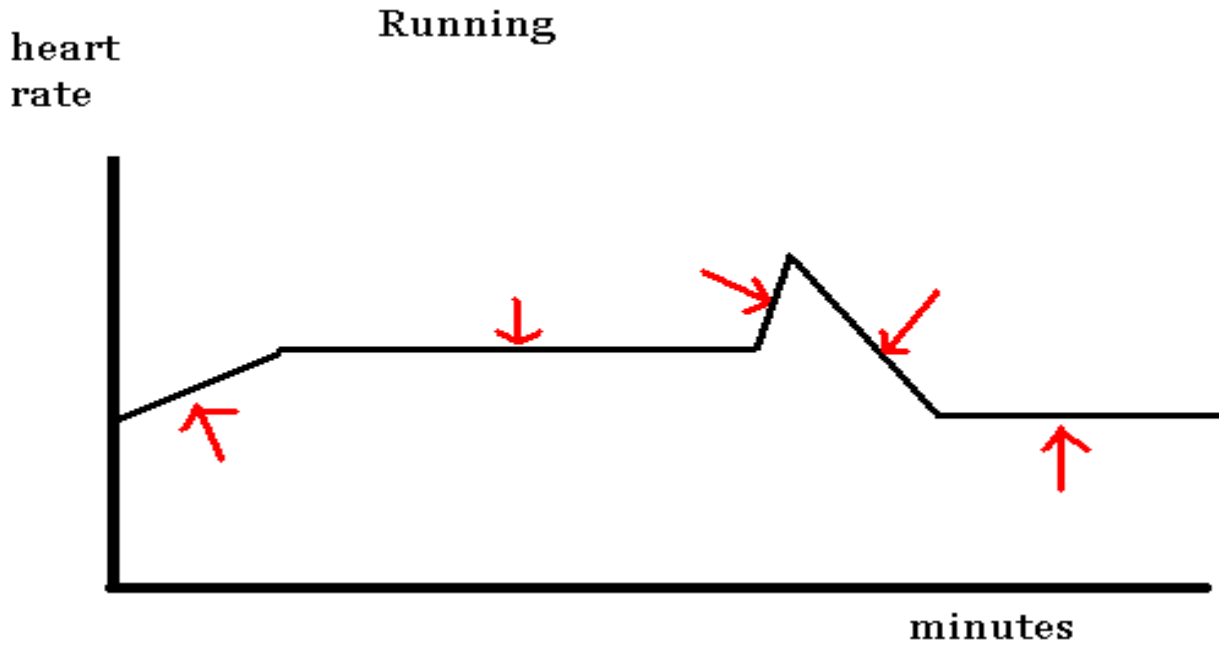

#2) For the following graph, tell the story of the graph by writing in what might be happening at each of the four arrows.

oven
temp.

baking something

#3) Label the five arrows below with what might be happening in the story for the graph.

#4) Make up a story for the following graph. Label the x-axis and y-axis, give the graph a name, and label the seven arrows with details of the story you make up.
